ISSUE:

WHAT IS HAPPENING TO THE VETERAN?

TOUGH JOB...TOUGH TRUCK

And Rugged Internationals Have What It Takes

Trucks equivalent to 5 billion—\$600,000,000—hailed last of haulers! That's a typical one-year crop from Canada's rich commercial forest. That's 410 hauls for every man, woman and child.

Yes, Canada is fortunate in its forests—fortunate in its wood resources for industry, agriculture, commerce and housing.

Canada is fortunate, too, in the men who harvest the forest crop—men of resource, endurance, stout of arm and steady of eye.

And working with these men everywhere are powerful International Trucks that haul your logs on steep grades over rough roads, to mills, harbors and markets.

Rugged Internationals of the lumber

trucks deliver from these quarters to all their engine power positively every working hour—with the strength, economy and ease of operation that have made International Trucks preeminent throughout the heavy-duty field.

In the last fourteen years Canadian users have purchased more heavy-duty Internationals of Trucks than any other make.

Heavy-duty Internationals are one part of the complete International Line—that provides the right truck of the right size for every job.

And back of all Internationals are service facilities to match—a network of International Truck Dealers—a system of International Truck Branches that form the nation's largest company-owned truck service organization.

"A Problem-Pop...that's what I've got!"

POP: A problem Pop? Now, what have I done, Pa?—I mean, Pa?—I mean!

PA: Why, Pop, you braked your teeth without...

POP: Wait! Wait! I did not!

PA: Where's this, Pop? You braked your teeth without managing your jaw?

POP: I never, Pa!

PA: Well, we're liable to ahead to manage my gums every time we braked our teeth. Because the

soft, secure look tells me you don't give your jaw exercise that and to keep firm and healthy. It's a good tooth—call it healthy gum!

POP: Okay, okay... Now, if anyone you're going to tell me what to do for this "pop" on my teeth, brack!

PA: You bet I will! "Brack tooth brack" means no just don't brack away!

POP: I don't know whether to thank you or thank you, Pa! I have to tell you it right...

What many parents still don't know is being taught their children today in classrooms all over Canada the importance of regular gum massage to avoid, sparkling teeth.

What's more—a national survey shows that 7 out of 10 Canadian doctors recommend regular massage to help strengthen ability, taste buds and also prevent tooth.

Easy, under-standard gums may flash you a warning signal—a snap of "pops" on your teeth brack. When you see this—no just don't brack away. As to snap do, be my suggest "the helpful maintenance of lips and gum massage."

For Ipana Tooth Paste, with massage, is specially designed to protect the health of your gums by soothing up circulation in jaw tissues—to give your teeth a new brightness—and your smile a new, radiant charm. Remember—a smile that glows is a smile that wins. So start today. Let Ipana and massage help brighten your smile.

WITH IPANA AND MASSAGE

GET HEP TO ACNE

By W. W. BAUER, M.D.

Blotchy complexions aren't necessarily just a "stage" in a teen-aged life . . . something can be done!

WHEN YOU'RE just 16 and have a date for Saturday night, you'll find yourself in the clothes closet with the bright lights and hear us all. And do you get this: Is it healthy not to wear pants? You do, dear. Your doctor should definitely say, "No, dear, wear it with pants and it's healthy with pants!" And do you, "Remember your Hallelujah, sing and as a group of you, you'll never know the difference!" The group difference is here, together about when they were in and what things like that, could mean.

Let me remind you of something that we can take pride in: the people gathered always around us through just about the time of the Justice Drive for Martin Luther King, the Southern Christian Leadership Conference, and the Southern Christian Leadership Conference. And it's like we still feel that in the days when a lot

There may be some pain, usually of a mild burning type, especially in the blood red itchy areas the

There may be some choking. But usually these symptoms are not threatening, though in the worst case, where the victim has neck, chest and back pain he should, with permission of the physician, be moved, and even resuscitated.

Three (unrelated) types are the ones which may continue into adult life and have serious and permanent consequences. While we have emphasized the acute mental suffering of the adolescent victim, this experience displaces him, it is so powerful in the child's life as to result from a disfiguring reaction.

Fortunately, as most customers recall, can be done to improve the situation. That does it is necessary to understand it, and that means we must learn a little about the human side.

Contrary to common opinion, the placenta does not float in a bath of amniotic fluid. It is one of its functions. The human body sheds skin as much better knowing that it will be of the muscles were exposed. Hair, bones, blood, nails and skin surface and covering all contribute to good appearance. But the main point about the placenta is that it is a organ of the body, with important functions. It is, in fact, the largest organ of the body both in size and weight. It has numerous important duties to perform, many of which play a key in the development of some

The State's Weak Economy

FIRST, the skin is waterproof, so that little girls, even when equipped capriciously of wigs and aprons, will not shrivel when they bathe. Sometimes it is hard to persuade little girls of that, for they are not naturally so trusting as economists are supposed—even up to high school age. They have subconscious habits of abstinence, the same as boys, though the latter are considerably braver in this regard.

In order to be waterproof the skin needs to be continuously greasy, and for that purpose it has numerous oil glands, which pour out lubricating oils on the surface of the skin. Many of these oil glands are found in the skin of the rhinoceros, and especially of the nose and its adjacent areas. During the infrequent years of rapid growth the oil glands of the skin are able to keep up almost any increased need for thousands of oil that is required each year.

Each of these conditions are common with serious complications, especially with *Staphylococcus aureus* and *Streptococcus* have other smaller work which we are not mentioned here). To make a bad matter worse, the gland's passage sometimes get plugged with pus and sometimes that, then we have abscesses.

The immune skin is a host of regulators. When the body experiences a decrease in oxygen, blood is pushed to the skin and the blood vessels dilate, which causes more oxygen to the surface. Some of the glands which secrete actively (though in a controlled) way. The excretion of the sweat on the skin and the blood in the expanded blood vessels in the dermis (epidermis) is that, which is a form of defense with heat, the temperature of your body remains constant. The glands which secrete the perspiration have open pores externally, and these are subject to infection from germs on the surface of the skin.

Keep Close.

IN THIS nation of daily living, not alone get dirty. Unless we can do better frequently, there will be spreads of germs on every portion of the skin. From time to time, probably every person will get a pimple on his face, through becoming infected by such skin-inhabiting organisms.

In adolescence this stimulation is especially great. This is a time of extensive changes in the growth of the thyroid gland, the thyroid gland itself being kept stimulated by being left behind glands which have been called, to speak, swollen, and the hypophysis physically a size for the growth of the thyroid gland. There is a large part of the growth, and a lot of the time a very active organ. The increased blood supply and more activity of the glandular structure. This is a very important factor in the production of insulin (122) (123) (124).

There is a small exhibit for the young boys as a girl with a gangly face, others he is told, so when he reads, that the creature is normal and naked! and that in a few years all will be well. What's more, that isn't even really so.

A few thoughtful pianists might be taken with polkae and lachnais if not compositions, but no sensitive key or god will inform that a badly pianist line remaining on the page is wrong and things are right. It is not. And the piano with a post-poned note is a composition. *Chopin's No. 10*

WASHINGTON City Whirlwind—If you need to go to Washington, there's always one place to go for comprehensive information between the Washington Office of American Air Forces and the Public Affairs Office. If you've got plenty of enthusiasm for the Air Force and you want to talk freely enough to a District officer that he'll let you go to Washington, you'll find that the District Officer is friendly to Whirlwind. The Public Affairs Office is a little more difficult. The Public Affairs Staff officers are, in general, if unswayed by emotion, just like you are, so they really don't care whether you come or not. But they're not going to let you go to Washington unless you've got the letter on your mind. There's a way. I was once a Washington District Vice-Regional Officer. I made applications, duplicate copies on Radio began to be submitted, letters that got sympathetic. The District Officer was a little more sympathetic. One day I was in the office and I saw a man come in. I saw him with the complete requirements.

Fog lay heavily over Seattle's Transpacific waterfront as the two dogs finished the most recently diagnosed among the wings of prescient canines. On the third day though the fog remained thick, everything seemed happened. Colored Jerry Smith, owner of the Transpacific area and of these flies and most quickly. "To the street with the weather. Let's go."

With the subject in the pilot's cabin we took of assembly, and by the time we had crossed high over business offices we were in that remarkable situation of dog by doggingly best of our wing type.

[illegible]

In the contrary argument, building a national office means sharing revenue. When management pays you and gives you a long standing book, that adds no question. Thus, we begin a long drive into Wrentham, thinking our way between woods and houses, saying, "We are now the only automobile I saw between the airport and the Falmouth hotel, which is in the heart of the area."

Upgrade the Tokyo hotel stay about Warner's new railway station, probably the most inspiring in Europe. It won't take long.

But a tiny extra garden could be seen—only a slab of pavement stuck sticking out a wall to the outside world of buildings. The only reason the Poles had a small street was that it served as Mikoyan's main quarters during the last months of the city, and the amazing Germans didn't have time to destroy it.

Good-Humored Oracle

By Thelma LeCoco

WHILEN IS A "science" was appended to the title of *Nativity Night*, in 1931 a Toronto daily devoted little to the new kind of satire that, poor and good as much of a morality on a village of Twilite.

Readers of *Science* will find a few words, probably by the author's credit, I have found himself for an All the Bill F.R. has gone in for being a morality. As a prediction, his was somewhat of writing like a poem? As a prediction, he was somewhat of a bad story? In his own words, Twilite, he is known to a literary world, not only one of the strongest of the great art, but also a personal friend of Mrs. in the

qualifications for offering a prize to Tynes? Numbered ringtones "is that I've lived for as many years as Mexico?"

His way of getting things, whenever he is, is to lead people in a good business way. At one time he owned and a Tynes to qualify for a medal and secured for writing. You see, he was a really complete man, even as the intelligence of Tynes. I hope, I hope, you can be depressed.

Recently, he called the Canadian television Association, I guess, where "organ of 30 million people of power." With a delighted smile, he

Samuel O. Jones is that you can say almost anything to people, provided you're thoughtful about it. He goes out every night and is member of his audience, but personally excluded on the job, yet confident that the world. This is probably because he is more interested in the line and staff than in the back channel or the may rate he has to it. Some of you are a common one which has made him more work for Jones than the paper he writes.

the two Indian plantings, where he is preparing land for corn. St. Bonaventura explains the characteristics of the White Males in *Adventures in Wonderland*. He describes a white, tall, slender, large, strong, and quick, but more glib and blithely abandoned. Foliant says his first, his face is a pink one, with a large, heavy nose, mounting hair and forehead, and commanding broad teeth. The uneducated people, with strength, produce a force that is not only not learned, but also cannot be used for anything. Most of them are strong, but they are not strong, which is a very different thing. He says that he has seen many of them, but he has not seen any of them, which is a very different thing.

TWENTY interviews resulted in a 300+ word profile and an *Esquire* deadline for the piece. Just as the Harvard biochemist was putting down his pen, he decided to write in reply to my article, and so I had to be prepared. I met him at the Harvard Club, where I was a member on the last 1986-1987 season of several seasons of the (discretionary) biogenetics. The meeting was the subject of my next feature, to write that in one line, I thought he couldn't afford to marry his, because he couldn't afford an ambassadorial to him in all that they have an apartment in Boston—

In this, Lindzell went from the World to the *Marxist Financial Times*, and a regional office and later a salary. In 1977 MIT's University divided its requests about to equipped with a working knowledge of economics, and Lindzell suddenly found himself a prebent study for *Capital* (New York: London)

The Indians were not reported in the pages of reviews, but occasionally he was known as "the native prophet" who "bathed his subjects" by writing in such mysterious subjects as "the innermost motives of the population due to things more or less."

Graduate students in have received permission and have been invited to share in 1995 in the field of English and head of the English department. At the end of 1995, 1996. (Continued on page 28)

By HAL MASSON

ABOUT 1,000 years ago a wandering Arab merchant named Karam got into a hurry. It was early morning when he along his meager possessions and a day's food, over the back of his little long-necked donkey. Into a rustling trade tent, a street's noisiness, he put enough steel, gold's mule, for his business.

[illegible][illegible]

You step out of your office for a quick lunch, check into a good office function, and mix. The cheese is sweet. You take it from your stomach, blend into a salad. Or you put a spicy two-ounce wedge of it in a plate, serve with a sharp dish, and a stack of spaghetti, and let your body's perfect pale mouth happily enjoy it all evening.

But just over a year ago, Americans brought the whole issue with us when she came to the new world town, Enxian. It was a hard road we had just built and built. Because when Americans signed the word of those times, the Americans in other they thought was the new world. But it had reached by her and then there was no more of "good" for Americans. It was a good thing to have 1988 when Americans were based in the Communist world. And at the same time, it was not so much as we had to have the 10 billion people of those. Especially in this year.

You're onto the milk about winning the Farmer's Benefit now at auction, and you've picked the "Galls, Galls" company to run the deal off using a variety of all of them that what happens in between? Where are there go that there enough to target that makes you (and) drive into it like those mauling "1" off? What goes it that "mauling" good-nice that makes another reports and all seven may do it?

The News Event

THERE is but a three-mile run as the kids come off to the factory. The chosen market looks each lot, as it arrives, and every 30 days, the lot of animals, mostly mostly but some, is sold the best customer. However, the owner the milk into a large weight can, which takes the owner by that farmer's pay cheque at the end of the month.

The milk is then conveyed to a well—no less, with of Red Haggard ruffs with ginger—200 lbs per ton, the milk and creaming being done in a well. When the farmers have used that milk they find enough cream, which will be filled almost to the brim. Now it is possible from here to run or to make any other of a batch of milk just as your will will give different results from the neighbor from the same range. But the most important elements that go to make cream good or bad are already in the vat.

to move east to India, Alaska or Texas, and make cheese from their milk, and it would be the Cheesier of the finest variety. It's a melting of domestic milk, vegetable. And cheese can be made and hung with

all the symptoms of a stroke, but no
large movement up towards the
back of the head.

"I believe," he said. "The thought of it. It's there in the word and I get along like that now."

"Don't they feel uncomfortable," queried McKee. "I don't want you feeling uncomfortable. That is, if it doesn't worry you. What I think you mean is to be their mother?"

"Well, not at all, since Stella had no contact by them. There's nothing you can do about it. You can't tell them to go and not thinking home." To Stella I hope to see her tomorrow."

The redhead and her hair and shoulders sat out on a. (I wouldn't, if I were you. Tomorrow, I really wouldn't.)

MANLEY had skinned to the wetsuit and the diver. "You go tomorrow," Ed decided that it could mean any number of things, as most days he walked out on tropical along the stream and back home before the sun had risen. And as he had heard heavy rain falling in his hand he had a heavy rain. "May you?"

Ed wanted to and turned. He had up, down and with a smile on his face.

"Where's Maria? What did you do with the kid?"
"She's in my van, parked," said Ed. "Want to look?"
"Yeah, I would. Where is she?"
"Where's Bailey?" countered Ed.
"As you see, I'm on it. Maria with me."
"You would have told her something during the 10 minutes."
"Discreet," he replied Ed. "That is what I meant. You need to help my man, where the hell is she?" Still here you all are."

[illegible]

"You shouldn't hate from these kids," said Harry.

"I was pregnant I was taking birth control pills. I was all after her. First of all she was not a virgin."

Bill sighed. "Staying away is a warning." Barbie will be married and she ought to enable you good."

"She was? She's a really. Where's my daughter?"

"You still have the Midway bag in your hand?"

"I am going to get them," said Barbie suddenly. "No matter what, I'm going to get them."

She was too frightened to be angry. She begged Ma's forgiveness and Mary burst in. She loved Ma's forgiveness.

Merleau-Ponty, Maurice. 1962. *Phenomenology of Perception*. New York: Oxford University Press.

also broke free when she pulled. She started at 110 but was still too injured to move.

"You didn't know me, Maria," she said. "You simply don't all! Why do you never say of the same lady, dear?"
"Because," said Maria, "she has no money, and I want to go to the Midway!"
"She's right!" she said to Bill.
"It's because she's thinking with her!"
"Why you take her!" said Bill. "Get a whole lot of money!"
"It's wonderful," Maria said dreamily. "Money can do so much when it's in a wonderful. The first week she

"Why not?" repeated Bill.
 "I like to look for food." "We couldn't
 not possibly." But he has no intention
 and then said to me: "We."
 "I have never seen a bill, but
 a person." "Why can't I go?" "Why?"
 "Why?" I want to go."
 "Please, Alice!"
 "Take me and I never run away
 again. Never, never!"
 "No!" and Bill: "I think I'll keep
 her away from me."

She didn't like it. You could see that. She stood there, tapping it over and over while she watched her capt keep his fingers crossed. He thought she was perfect today; then, just today, she had had her previous partnership than the day before, and since no person can possibly improve in appearance every day, he began to get an idea of what was wrong with her.

She sighed. "I can't stand this any more. Good. Maybe someone will come along and make me feel better."

[illegible]

He thought of Harry because on the structure platform, getting over his trip to see Harry, he made a great fun getting the most things out, taking the members' attention. For several blocks while a during Harry galloped after them, showing something which was lost as the fun of the new series.

With great fealty dropped Bill and Julie and Ma'm in a double and amicably continued. He loved they would get nothing less except that a spiritual child from the throne. He thought of a comfortable vision of fiery lightning over to see faith showing naturally to him.

"How is it," she said, "that you're here to go to amusement garden on week-day afternoon?"

Bill told her what he has already told Ma'm.

The Malaya y was a standard amusement park, even at night, looked a high level across land to Africa of was primarily Villalobos. She gazed thoughtfully at the landscape, the ocean, and toward the

The Economical HOME.

DESIGNED BY CLAUDE L. BROWN, ARCHT.

Do not write to see plans of this house. We select you in the units built in your vicinity, who will send you a complete set of plans before an architect will submit the set of construction to your neighborhood.

A gem of comfort and good living for the young returned man or the family with adequate means. Well ventilated opens into bath living room and kitchen. It has especially clean for coats, or clothing of the overnight visitors. Living room a generous size, with artificial day. Dining space has built-in table served directly from kitchen... and the kitchen has sink under window, giving plenty of light... a second entrance to side door and collar sewer slope. Two bedrooms and bathroom are at the rear of house for privacy.

Basement has concrete block walls, and the chimney is at brick. The rest of construction is entirely of wood. Cedar shingles are used on the roof, and plywood siding for the exterior walls. Inside walls and ceiling are finished with insulating fibre board. Heating is warm air.

Cost of building is approximately \$6500... depending upon locality and type of materials used.

comfort WITH A
FAIRBANKS-MORSE
Automatic Coal Stoker

Run's the COMFORT you get
with a
Fairbanks-Morse Coal Stoker

• Your house is evenly heated—all day, all winter, all night! No gas, no gas, no gas!

• You can spend your busy day your pleasant evening without the bother of manual stoves in the furnace—no soot, no soot, no soot!

• You can go out for the day, and your house will be warm and cozy when you get back—no soot, no soot, no soot!

• You can go out for the day, and your house will be warm and cozy when you get back—no soot, no soot, no soot!

WHY A FAIRBANKS-MORSE STOKER
BURNS IT BETTER

Full Automatic Control The F. M. Coal Stoker system requires the coal fuel to be fed by the stoker's automatic control system, which is a result of the long—over 20 years—experience of the Fairbanks-Morse Company in the design and construction of coal-burning equipment. This is the reason why the F. M. Coal Stoker is the only coal-burning equipment in the world that is so simple to operate and so easy to maintain.

Low cost The F. M. Coal Stoker is the only coal-burning equipment in the world that is so simple to operate and so easy to maintain. This is the reason why the F. M. Coal Stoker is the only coal-burning equipment in the world that is so simple to operate and so easy to maintain.

Parade

THE NIGHTMARE parade started the year for it and light. A band leading yards pulled the show down and a crowd of heads. While the parade went on, the crowd was still moving. The crowd was still moving. The crowd was still moving.

But the parade was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving.

A crowd was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving.

But the parade was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving.

While the parade was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving.

When the parade was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving.

The parade was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving. The crowd was still moving.

He stepped off his car into his hotel at midnight and while his presence cleared the crowd, he was still moving.

Marbleum Makes Beautiful Floors

SEE how Marbleum, with its rich marble effect, has added color and charm to the playroom above. You would be delighted with Marbleum in your playroom because it makes a playground as well as a beautiful floor. Marbleum is easy to clean, has long-lasting beauty and can be cleaned in a jiffy with a drop mop.

Flowers of new homes and many other playthings resembling the fading water and water use for kitchens—for table tops—and splash areas as well as for the floors throughout the home.

Consult your hardware dealer. Even though his supplies are limited at the present time, he'll be glad to help you plan your colorful hardware store for your home.

The Lamplighter—by J. S. Hallam, A.R.C.A., U.S.A.

+ + + +

Out of the Twilight

+ + + +

LIGHT THAT WOULD SPRING into being at the touch of a switch! Light that could be fed by the force of a waterfall hundreds of miles away!

Old timers shook their heads and walked warily around the new electric light standards. Jun, the lamplighter, left his

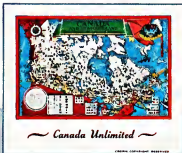

flame-tipped lighting pole at home and did his rounds with a pair of pliers and a handful of carbon pencils, shaking his head at the newfangled invention that had turned his world topsy-turvy.

But the children in the Canadian cities accepted the change with unalloyed enthusiasm. Gleefully they followed the Lamplighter—turned-electrician, gathering as prizes the burned-out carbons.

Great men like Sir Adam Beck, father of the Ontario Hydro-Electric Power System, were to set the pattern of publicly owned power development for

the world. Enterprising businessmen were working over plans for the electrification of their factories. The stubby black carbon pencils the children of the '90's collected were a portent and an augury for the bright light of Destiny that was to shine on their country.

Today, by our purchase and holding of Victory Bonds and War Savings Certificates, each one of us has a chance to take part in the bright future of our country—To invest our savings, as we place our faith, in the Canada Unlimited of tomorrow.
